MINING, BUSINESS AND STOCKS.

MAY DAY WAS STRONGER TODAY.

The Highest Figure in Many Kimberley, Johnson and Snyder Months Reached Today.

GRAND CENTRAL FIRMER.

Lower Mammoth Stationary - Ajax Weaker-Sacramento Stiffening Up -Silver Shield Stronger.

Business closed on the mining exchange today with the sale of 31,800 shares for \$14,673.37. Among the features of the call was the sharp advance in Grand Central, which sold at \$7.49. Lower Mammoth was also quite strong around \$4.50. Mammoth was active between \$2.561/2 and \$2.521/2, while May Day opened at 66 and sold up to 6916. Ajax declined from \$1,061/2 to \$1.041/4. while Con. Mercur sold at \$3.30. Sacramento moved up to 4514, with Silver Shield active up to 12 on the closing sale. South Swansea sold from 75 down

to 72½, while Star Con. opened at 56½ and closed at 57¾. Tesora was weak at 74. Ben Butler weakened from 11 at the opening to 10¾ at the close. Manhattan was traded in at 1½, and Martha Washington. Washington was quite firm around 19. Northern Light moved up to 12. Daly sold at \$2.19, while Eagle & Blue Bell dropped 200 at 86.

The closing quotations were as fol-

OF NOIS THE NAME.

DALTON & LARK DEAL IS CLOSED.

Are the New Owners.

INVOLVES SUM OF \$750,000.

P. T. Parnsworth Bought Out for \$150,000 - Purchase Includes 4 Groups or 34 Claims in All.

After several months of sparring the Dalton & Lark deal was closed today. A dispatch was received from Chicago this afternoon, which conveyed the news to the office of W. F. Snyder & Co. Mr. Snyder, who is in the East, has been the moving spirit in the closing of this deal which is the biggest mining deal recorded since the sale of the Centennial Eureka. It involves the payment of almost \$750,000, of which \$150, 960 has already been paid down. The principals in the transaction are P. L. Kimberley of Sharon, Penn., William A. Johnson of Denver, and W. F. Synder and P. T. Farnsworth of this city. The three first named parties have bought Mr. Farnsworth's interests in the property for the sum of \$150,000, which leaves the big group of rich claims in the absolute control of the powerful syndicate of Messrs. Kimberley, Johnson and Snyder, The property involved in the deal consists of four groups of mines, known as the Lead Mine, Dalton and Lark, Antelope and Sampson properties, making in all a matchless group of thirty-four claims. The Lead Mine consists of twenty-one claims the Dalton and Lark and Antelope and Lark and La claims, the Dalton and Lark and Antelope groups have four claims each, and the Sampson group has five claims. Some of this property was owned by Mr. Farnsworth, who also secured an option on the Lead Mine and Daiton and Lark last year, Mr. Snyder later became interested with Mr. Farnsworth last August, through a balance of \$55,000 which was paid on the Lead Mine option taken up several years ago by the Dalton and Lark company. The Schenk interest in the Dalton and Lark was purchased in the beginning of the year which gave beginning of the year, which gave Messrs. Snyder and Farnsworth the control of 1,400,000 shares of Dalton and Lark stock out of 2,500,000 shares. Under the terms of the Dalton & Lark option the shareholders in that property are expected to receive 12

time, and it is not probable that the payment will be postponed as might be done if the owners desired, seeing that the control is now in their hands. A debt of about \$30,000 remains to be said off which will allow the shareholders nearly 11 cents per share for their stock, if they desire to sell. It is more than probable, however, that the stock will be worth more than that figure before many months, as the new owners contemplate pushing the lower tunnel to the ore bodies as quickly as

The mine has already been opened up to a depth of 1,050 feet and it is said that nearly \$5,000,000 worth of ore is now in sight, which cannot be handled at present on account of the great flow of water. The big tunnel now in 350 feet will tap the ore bodies 200 feet deeper, and thus, in draining the mine, afford an economical way of getting the ores to market. The tunnel will be over a mile long when completed and a double track is to be laid for all that distance, as the new owners con-template spending over a quarter of a million dollars before any ore is ex-tracted for market. When all is ready will probably be found that the company will own its own reduction plant Johnson is known as the millionaire smelter owner of Denver, while Mr. Kimberley besides being one of the owners of the Annie Laurie at Gold Mountain, is heavily interested in other Utah mines. It goes without saying that with millions at their backs these men will not let the new enterprise lan-

Mammoth Dividend. The directors of the Mammoth Mining

guish for want of means.

company met this afternoon and de-clared a dividend of \$20,000, or 5 cents a share, payable on the 8th, the books to Arthur Buckbee's Operations.

Arthur Buckbee, manager of the Cumberland mines at Silver City, was in Boise a short time yesterday, route to the Coeur d'Alene section says the Boise Statesman. Mr Buckbee goes to the "gold belt," Coeur d'Alene section, where he has personal mining interests. He says it is a strange thing that the people of Murray and vicinity have so little faith in their gold belt, because, to the best of his observation, they have a number of excellent prop-

Some time last fall, a proposition was made to Mr. Buckbee to take hold of the Cleveland property. Very little development had been done, and as a rule the people of the section derided the idea of ever making it a mine. But he investigated and found things so favorable that he took hold. He made a deal giving him control of the property by the payment of certain installments, and with a contract to

keep a certain force of miners continually employed.

Things looked blue along in November and December, but late in the latter month reports of an encourag-ing nature came to him from his men, Work has been stopped on his property for the past two months, but today he starts for Murray, and on his arrival there will start work again, and probably upon a larger scale than ever. The reported new strikes wil be in-vestigated, and if they look to him as though stable and favorable he expects to have a large force of men employed and by fail hopes to have ore enough on the dumps to justify reduction on th works.

The Week in Park City.

In its weekly review of Park City the Record says: Superintendent Hickey of the Comstock reports the station completed and the work of crosscutting to the vein from the 300-foot mark in the shaft begun. The 1,000-gallon station pump is in readiness for immediate operation, all connections having been made. The new cages, cars, rails etc., have all been delivered at the mine, and in a ort time something may reasonably expected to develop at this property. The tunnel on the Steele group is now in a distance of over 300 feet, between lime hanging and quartzite footwall, and Mr. Steele, who is pushing it sin-gle-handed, informs the Record that

the character of ground is rapidly changing for the better, being softer and rendering progress more rapid. He says he has encountered three or four small carbonate feeders, which satisfies him that he is not very far from the

main ledge,
A shipment of supplies, consisting of cable, wire, bell, etc., arrived the first of the week for the Bogan, and was taken up to be put in commission at

ORE SHIPMENTS.

Following are the shipments of ore from the Mackintosh sampler for the

past week: Ontarlo

Items from Tintic.

In its review of the camps the Tintie Miner says: A small body of ore which Superin-

tendent Ball has been following from the 700-foot level of the Lower Mammoth is reported to have opened up about forty feet above into a big stope of excellent shipping material. In the meantime work is being continued on the drift that is nearing the ore chuice on the 900-foot level, and as much ore is being raised as the limited compressor power permits.

Sor power permits.

The ore chute which the Eag'e & Blue Bell has been drawing on for an excellent shipping product on the 350 level has been tapped in the west drift from the winze fifty feet below, and the management has fifty feet of stoping ground. The character of the ore has changed somewhat, the lead val-ues being principally in a sulphide form, besides which the gold and silver values in the quartz continue up to the mark. The east drift, also indicates the close proximity of an ore body. A shipment will be sent to the smelter at an early date.

Tintic Shipments.

MINING NOTES.

Six cars of ore were marketed today from the Swansea of Tintic. The Grand Central of Tintic had ten

cars of ore on the market today. Three cars of ore from the South Swansea of Tintic were on the market

Supt. R. B. Moon says the West Morning Glory vein is looking better than ever.

The Silver Shield of Bingham had two cars of concentrates on the market today.

W. H. Tibbals has secured the control of the Boston and Tintic company's

The Humbug, owned by Jesse Knight of Provo, reached the market today with five cars of ore.

Isaac Trumbo is reported to have resigned the receivership of the Golden Cross mines in California. Simon Bamberger is back from Tin-

tic, where he has been looking into his interests at Mammoth and Diamond. The monthly meeting of the directors of the Yankee Con., scheduled to take place today, was postponed for one

James W. Nell was in town today. He is still working on the Mammoth examination with a force of four assistants.

Col. George W. E. Dorsey is back from the East and expects to shortly increase the force at the Galena King of Stockton. H. B. Cole and Leo Marix began busi-

ness today on Brokers' row under the name of the Cole-Marix Investment company.

W. C. Brown has reached the city on his way to the North Mountain Mining company's property in Cherry Creek, Nevada,

The entanglements of the morning papers on the Ontario deal (?) are amusing. It would be better for the public and the papers if less rumors and more news were published.

The Bingham company's matte from the new smelter will not be handled by the A. S. & R. company, but will go into the hands of the United Metals Selling company after today,

Regarding the issue which is reported to have come up over the price at which Silver King stock changed hands last week ,the "News" is able to state from perfect knowledge that a 25-share block was sold at \$82.50 per share.

R. G. Wilson came back from New York yesterday afternoon, where he has been for several weeks endeavoring to secure the control of the Ontario Park City. He was not successful, though he has not yet given up hope of accomplishing his object.

In the Century and West Century Mining company's dispute about a stream of water in the camp, a re-straining order has been secured which prevents the latter company using the water until some time in May when the order is returnable.

Hon. J. W. Weeks, of the firm of Hornblower and Weeks, of Boston, has arrived in the city from the coast. Mr. Weeks is largely interested in the Bingham Copper and Gold company and expects to spend a few days look-ing into the mining situation of Utah.

AUCTION.

On Tuesday, April 2nd at 154 So. State St. (Sign Red Flag.) A general stock of Dry Goods, Shoes, Hats and Notions. Sales to commence at 10:30 Each Day and continue until all are sold.
C. W. BOUTON,

OPENING VERY EXCITED.

Buying of Railroads and Steelers Caused Many Advances.

Trading Irregular and Feverish, Price Variations Being Constant and Conflicting.

New York, April 1.-There were wide

and excited openings in Rock Island and United States Steel stocks and a number of railroad stocks showed violent advances. There was a fair sprinkling of losses, in which were included Burlington stocks 24. Five thousand shares of Rock-Island sold simultaneously at 1.35% to 1.36%, compared with 1.35 at the close on Saturday. Fifteen thousand shares of United States Steel and as much of the preferred changed hands at the opening, the common ruling at 46% to 47½; compared with 46½ on Saturday, and the preferred selling at 96 to 96% compared with 95% on Saturday. St. Paul rose 1%, Lake Erie & Western, 2½ and there were opening gains of 1 to 1% in Lackawanna, Delaware & Hudson, Union Pacific, Manhattan, Smelting, Tennessee Coal and People's Gas. Very large blocks changed hands in many stocks. With business in increasing volume and many stocks moving independently, speculation was very much confused and excited. It could be perceived, however, that the ously at 1.35% to 1.36%, compared with could be perceived, however, that the steel stocks were determinedly supported, prices being bid up steadily in the face of large offerings. Both the inde-pendent companies and subsidiary com-panies of the United States Steel corporation were affected. The gains ranged from 1 to 6%, the latter republic Steel preferred. With but a few exceptions, stocks were sold to realize profits particularly those which were conspicu-ously strong at the start. Declines extended to a point or over, Rock Island losing 1%. Reading common above 37 near 11 o'clock, Sugar rose 1% and Rock Island and People's Gas recovered to the buoyancy of several leading stocks Rock Island got up 4½; Union Pacific 2½ and Southern Pacific a point. United States Steel broke through the barrier at 47½ and rose to 48 but the preferred dropped to 96. Pullman rose 6¾, Consolidated Gas 3 and Northwest preferred 2¾. All of the steel stocks preferred, 2%. All of the steel stocks moved onward except Sloss Steel and Republic Steel common and preferred which fell on profit taking. Purchases of the railway list became larger between the Northern Pacific and Burlington were less active and lower, Burlington touching 1.72½. The market was feverishly irregular and price variations were constant and conflicting.

Bonds were irregular. The local tractions were brought into the upward movement at advances of 1% to 2½. Tobacco rose 1½; United States Steel preferred rose to 97, and the common to 48%. Meanwhile the burden of profit taking grew and turned prices downward, reactions running from 1 to 2 points in all the principal active stocks. Lake Erie & Western made a violent break of 4% from the top level, and the closing was animated and irregular under the influence of continued profit taking at some points and covering by room
